

*Dear Customer:*

**Notice of Tree and Brush Work >>** Trees are an important part of our environment. However, they can sometimes interfere with the delivery of electricity. To help maintain safe, reliable electricity service, ***we will soon be pruning or removing trees and brush near power lines in your area.*** This work will not involve the wires that run from the utility pole to your house or place of business.

Asplundh Tree Expert Co. will be doing the work using cutting techniques recommended by the Tree Care Industry Association to promote growth away from power lines. In yards and landscaped areas, they will chip branches and brush and haul away the chips. Wood will be left in easy-to-handle lengths. In non-landscaped areas, cuttings will be left to decompose naturally.

If you have any questions about this work, please contact me at 845.278.8120, ext. 229, within five business days.

Thank you,

Samuel Miller – Division Forester  
Beford Hills 463
