

OOCK, a design resource for sustainable living and the first green design boutique in the region, is opening it's doors this week at The Arcade Building in Bedford Village, NY.

OOCK, is an acronym for **Office Of Carol Kurth**, an award winning Architectural firm based in Westchester, NY that has created the sustainable design store.

OOCK will be the first physical retail presence in the area that is completely dedicated to green products for the home. While many existing stores feature green merchandise, OOCK's entire product offering is devoted to the ideal of sustainability. Further, OOCK offers a comprehensive retail experience to help educate customers about eco-design. OOCK is also launching a weblog, which will offer tips on sustainable living for the home.

Created to showcase exciting possibilities for green home décor and environmental concepts, the OOCK philosophy is that responsible living can be luxurious and in harmony with one's lifestyle.

Visit **OOCK** Monday thru Friday 9AM to 5PM or by appointment.
